Century Solar Energy

Living Green

Solar Products Wholesaler
Solar PV system Designer & Installer
Warranty Service Provider

Be free, be energy free

Connecting you to the technology resources you need

We are committed to powering a brighter future by empowering each household and business to use green and clean energy. We have a dedicated team of engineers that plan and design residential and commercial renewable energy projects, and our installers are trained to deliver to the most stringent Australian and International Standards.

Did you know the area of roof space available in Australia is enough to provide all of the nation's electricity, using solar panels?

Century Solar Energy is a professional solar company with offices and distribution centres in NSW, QLD and VIC. We are strong and reliable solar products wholesaler, designer, and installer. With us you can enjoy the best value products imported directly from well-known manufacturers around the world. We act as sole selling agent for many solar products manufacturers and are authorized to provide warranty services for their products sold in Australia. With our professional team of PV engineers from UNSW, you will be sure to have the best technical support and most updated resources readily available at any time.

We stand for superior quality products, solid warranties, and strong technical support. Our expert team is here to help you identify the best renewable energy solutions for your property. With us you can have exactly what you need at the most competitive price, and enjoy fast and flawless system installation, and ongoing support. Act now and get our exclusive offer.

flexible energy saving solutions for you or your business
